HARI SUPRIYA DARABOINA

GitHub | LinkedIn | daraboinaharisupriya@gmail.com | 9391540096

EDUCATION

- B.Techin Computer Science and Engineering
  SRM Institute of Science and Technology (Graduate: 2028) CGPA: **9.73 (**4th Sem, 2026)
- Class XII (State Board) | Sri Chaitanya Junior College Percentage: **87%**
- Class X (CBSE) | Dr K.K.R. Gowtham Secondary School Percentage: **84%**

TECHNICAL SKILLS

Programming: C,C++, Java, Python
Core: Data Structures & Algorithms, OOP, Problem Solving, SQL
Backend/Web: Node.js, Express.js, Flask, REST APIs, Firebase
AI/ML: Machine Learning, NLP, Recommendation Systems
Tools: Git Commands, Github

EXPERIENCE

ShadowFoxInternship(Virtual) **DECEMBER 2025**

- Developed TextFlow Assist and Loan Approval Predictor using NLP and ML concepts
- Built functional prototypes and gained hands-on exposure to model development

UPLYX Solutions Internship (Virtual) **JUNE-JULY 2025**

- Built a music recommender system using data-driven recommendation techniques
- Applied ML concepts for personalized song suggestions

LEADSHIP EXPERIENCE

TECHNICAL CO-LEAD | INTELLECTS CLUB, SRM IST RAMAPURAM

- Collaborate with the technical team to plan and coordinate workshops, learning sessions, and club initiatives.
- Contribute to technical recruitment, competitive programming activities, and peer learning.
- Support team coordination and collaborative project development while encouraging continuous technical learning.

PROJECTS

ClusterNodes (Winner project, Hack2Future 2.0)

- Built graph-based distributed systems analysis prototype using BFS, DFS and Dijkstra
- Visualized node interactions for infrastructure monitoring and anomaly insights

Intellects Workspace — Club Website & Attendance System

- Developing a comprehensive website showcasing the club, its team, activities, events, and gallery.
- Implementing a member attendance marker with photo verification and attendance codes.
- Designing an admin dashboard for attendance activation and member management.

Bhojantra

- Built multi-service platform using Node.js, Express and Firebase
  Integrated secure transaction validation for service agreements

Research & Innovations

AI-Driven IoT Framework for Renewable Energy Microgrids — Research Paper

- Developed an AI-driven IoT framework for predictive maintenance.
- Focused on anomaly detection in renewable energy microgrids.
- **Achievement**: Best Paper Award — AISES Conference 2026, CHRIST University.

RapidClaim — Research Paper & Patent in Progress

- Designing AI-assisted claim processing workflow using OCR and LLM pipelines
- Research manuscript and patent filing currently in progress

Bhojantra — Patented

- Patented for multi-service platform architecture proposed in project work

ACHIEVEMENTS

- **Winner–Hack2Future 2.0 | IIIT Dharwad** **APRIL 2026**
- **BEST PAPER AWARD | AISES 2026 CONFERENCE | CHRIST UNIVERSITY, KENGERI (BENGALURU)** **SEPTEMBER 2026**

CERTIFICATIONS & ACTIVITIES

- Completed NPTEL Programming in Java — Score: 78%
- Completed NPTEL Programming in ML — Score: 63%
- Completed Artificial Intelligence course — IBM
- Participated in the Game Development Workshop conducted by CloudCon Club
- Completed the Ethical Hacking program by Google Developer Student Clubs
